 **IslandSpas**
by ARTESIAN

A close-up, high-angle photograph of several circular spa jets in a hot tub. The jets are made of polished chrome and are set into a dark, possibly black or dark blue, acrylic tub shell. The water surface is slightly rippled, reflecting the light. The jets are arranged in a pattern, with some in the foreground and others receding into the background. The lighting is soft, highlighting the metallic sheen of the jets and the texture of the tub material.

Higher Standards. Better Value.

Island Spas from Artesian are some of the most attractive spas on the market. But this competitively priced spa does not compromise functionality for beauty. Built to the same world-class standards of quality – by the same gifted hands – that bring the Artesian Platinum Elite spas to market, the Island is as unflinching in quality as it is in curb appeal. But the expert craftsmanship and stunning design are not the only compelling aspects of the Island Spa – this spa is built to deliver robust and meaningful therapy, performing consistently at the top of its class. And what's more, with the Island spa, each spa is uniquely crafted to meet your specific needs and cater to your demanding tastes while always finding a way to accommodate your budget. Our promise is to build you the highest-performing, best-looking, greatest-value spas available in the market – you get to pick the Island spa that perfectly fits your needs. Ranging from 13 jets to 72 and everywhere in-between, with outstanding and attractive options such as the **Rain Forest** water feature or the dynamic **DynaBrite™** LED light system, each Island can be a one of a kind, personalized retreat. Relax in an Island of your own.

HELIX: A New Spin on Spa Jets.

The Island Spa line features a revolutionary breakthrough in hydrotherapy jetting that makes use of the timeless concept of the helix, a three-dimensional double spiral form. This new jet, aptly named the Helix, has been designed to provide a truly revolutionary hydro-massage exclusive to the Island Spas by Artesian. Engineered from the concept of the double helix, the jets use a right-directional spiral on the inside of the cylinder. This causes water to spiral out in a twisting manner, providing jet pulsation and massaging pressure.

The two largest Helix jets, named **ProHelix**, provide a high volume of water to massage large muscles in the body. The midsize Helix, called **TheraHelix**, is strategically placed in small groups in the spa to massage muscles such as calf, hamstring, deltoids, biceps, and triceps. The smallest Helix jet, the **AccuHelix**, is placed in large groupings to massage larger regions of the body, such as the entire back. As a complete system, four to five different sizes of Helix jets are featured in every Island Spa model.

Experience a one-of-a-kind splash every time you enjoy your spa with the optional Island Pillowfall. Water pours from the spa pillow, creating a soothing waterfall with all its tranquil effects. Simply enjoy the serene sound of the falling water or nestle under and feel the warm water sweep down your neck and back.

LED Lighting Systems

The right lighting can add the perfect touch to your spa experience, and Island Spas' LED lighting systems are designed to set the mood. Our ten-function system leaps to life with a touch of the button on the spa control pad. Each touch washes the water with up to five different colored lights and allows the user to stop on any one of the preferred colors. Scroll further with the control button, and you will discover a multi-colored adventure with each new touch. The final five functions are different combinations of colors set side-by-side in an artful transition. This dazzling light show is your boarding pass to a truly adventurous soak. Our LED systems are available in three unique configurations – **DynaStar**, **DynaPoint**, and **DynaBrite™** – ask your dealer which system is perfect for you.

Optional Stereo Systems

With your own Island spa in your back yard, total escape is within easy reach every day. An Island in-spa stereo system is the perfect addition to complete your luxurious retreat. Now, while your muscles are being soothed to a state of abandon, the sounds from your stereo system will lift your heart and soul. You will

Poly-Planar stereos feature a floating remote control.

appreciate one of our marine-grade, state-of-the-art surround systems, complete with a powerful subwoofer. These weather resistant systems can also come equipped with cabinet mounted patio speakers. Available with the cutting-edge sound of industry leading Poly-Planar speakers, complete with a floating remote to easily navigate your music selections as well as our standard In-Tune system, we have the sound for you at the price you need.

WhisperPure Circulation System

The amazing .25 hp 1 amp super high-efficiency pump circulates water through our special Micron filter and through the high-yield ozonator and heater, up to 100 times per day. This system delivers the cleanest and most regulated water 24 hours a day, while insuring real cost savings for the user.

Rainforest Waterfall

The new optional Rainforest Waterfall Aquaserene feature adds a beautiful, soothing touch to your Island Spa. The LED lighting in this pop-up water feature creates a stunning "curtain of light" as the water cascades into the spa. This feature is only available on Island Spas ordered with a 24-hour Whisper-Pure circulation system (the Rainforest Waterfall operates off the circulation pump).

Switchless Motors

Our Switchless Motors drive high-water-volume pumps that are long-lasting and virtually trouble free. The switchless motor design does not require a mechanical switch to take it from the start position, which greatly increases the efficiency of the motor. An added bonus to all of the other great features of the switchless motor is this design requires from 10 to 16 fewer parts than a conventional motor, which means many components have been eliminated that sometimes create problems. The life of our switchless motor can be measured in tens of years instead of hundreds of hours.

Spa Within a Spa

It is nearly impossible in many spas to accommodate a large bather load. The water rises, causing the water to spill over and also causes lack of filtration when the water rises above the filter. This Island line features a **Spa Within a Spa** design that allows for several spa users while maintaining continuous filtration without water loss. There are two main features working together to make this possible. First, a lip or catch bin below the actual edge of the spa prevents spillover. Second, an added 5 inches of height to the top of the filter maintains filtration when the water level rises.

Bimini 91 x 132 x 36

The 11-foot-long Bimini is essentially two spas in one. Combining the most popular seating features from the Grand Bahama and the Grand Cayman, this spa boasts two luxurious loungers located at the filter end of the spa, each with unique massage configurations. The other end of the spa shares three full therapy seats, arranged in a similar manner to the Saba. Aside from the incredible 72 jets and five full therapy seats, the Bimini has plenty of room for a large group to enjoy. It has eight total seating positions as well as the popular cool-down seat. This spa is built for those who truly want to have it all.

Options on an Island Spa:

- Stainless Steel Escutcheons
- In-Tune or Poly Planar Stereo with optional patio speakers
- **DynaStar**, **DynaPoint**, and **DynaBrite™** LED lighting
- Pillowfalls
- 24 hr. Whisper-Pure Circulation system
- Ozonator with optional Propure mixing chamber
- Rainforest Waterfall
- Gorgeous PermaWood™ cabinets

Standard Features on Every Island:

- The “spa within a spa” design serves to increase bather capacity and prevent spillover.
- Valves are used to move water between seats, and each jet is individually controlled, allowing for complete water and massage control.
- Comfortable, ergonomic seats are at varied depths to accommodate different spa users.
- Jets are strategically placed in each seat at the body’s pressure points to maximize an effective massage.
- Ground breaking Helix jets deliver deep muscle penetration for an effective massage.
- The unique Helix design delivers an active massage even through static jets.
- The dashboard layout of spa controls makes it easy for users to control the spa while bathing.
- All Island Spas come standard with state-of-the-art digital controls.
- Island Spas come standard with a clear heart redwood cabinet or can be upgraded to the optional long-lasting and great looking PermaWood™.
- The entire frame of the Island Spa is built of 100 percent pressure-treated lumber that will not rot or rust.
- Full foam insulation is used between the cabinet and the shell for optimum heat retention and unparalleled plumbing security.
- All Island Spas are built with an ABS spa base.
- The bottom drain in every spa allows the spa to be completely drained by simply opening a valve – without removing any part of the cabinet.
- The use of switchless motors insures the longest pump life of any spa on the market.
- Innovative full-flow plumbing increases water flow to jets and reduces flow resistance.
- The Island’s leak-proof plumbing is comprised of special high-quality flexpipe and hoses.
- The plumbing connections to the jets are both glued and clamped, which diminishes the potential for plumbing-joint leaks.
- Virtually failure-proof flow switches are used in the Island Spas, instead of pressure switches.
- Dry or wet, seating in an Island Spa is among the most comfortable in the industry.
- Hand-sculpted tooling makes Island Spas by Artesian the most attractive and ergonomic spas in their class.

Acrylic Colors

Island Spas builds all our shells using the most durable cast acrylic materials and processes available today, and many are available with antimicrobial protection*. Tested safe and registered with the EPA, Microban penetrates and disrupts key cell functions of microorganisms. Although spa owners should still follow a regular maintenance program, Microban inhibits the growth of bacteria that cause odor and stain between cleanings. And, it works with your regular treatment regimen.

*For color options and more information, see your dealer for details.

Made to the Highest Standards

Looking for a spa can be a daunting experience. You want to know you are getting value for your money.

Full Foam Insulation

The space between the maintenance-free cabinet and the structure is filled with high-insulation foam. Full-foam insulation combined with our heavy-duty spa cover works to ensure the best rate of heat retention available in any spa. But that’s not all! Full-foam insulation offers a host of other benefits, such as a stronger spa structure and less wear on plumbing welds by holding all jets and hoses securely in place. This dramatically increases the lifespan of the plumbing by virtually eliminating movement and vibration.

Durable Acrylic Shell

Every Artesian spa has a durable shell constructed of beautiful acrylic with our lifetime Diamondbond backing. Our jets rotate on bearings rather than plastic for ease of adjustment, and our pillows are a dyed-through, closed-cell foam to prevent cracking, discoloration, and water absorption.

Optional Long-Lasting PermaWood™ Cabinet

Every Island Spa by Artesian features pressure-treated lumber in the frames to support the spa and to serve as the base for the standard natural wood cabinet. A beautiful, long-lasting PermaWood™ cabinet is an available option, adding years of maintenance-free life to your Island Spa. Every Island Spa also comes standard with a full ABS bottom, as well as a bottom drain for easy water changing. We build a spa the same way a good house is built – to last!
